

**Timothy Hudspeth**  
 Founder / President / CEO

Tim Hudspeth, Founder, President and CEO of AccuTech Construction remains constantly focused on ensuring that his customers become satisfied repeat clients by listening and delivering building solutions that serve their needs. Tim carefully applies the right resources, tools and experiences from his twenty years of constructing technologically advanced facilities to make his client's project become reality. Tim has assembled the most qualified team of seasoned professionals to shoulder the tasks required to deliver beyond his client's expectations for quality of work, value and speed to the market.

According to Tim, the greater the technological challenge, the tighter the schedule, the more his firm shines when they deliver. And he does deliver by working hand in hand with his clients, their design and engineering consultants, and remaining personally engaged. Whether it is delivering a Tier 4 Data Center capable of operating at 5-Nines reliability or handling multiple renovations of utility campuses or memory care facilities simultaneously across the State of Florida, Tim and his staff meet the challenges head on. Beneath Tim's understated and reassuring personality, it is his personal compulsion for achieving industry-leading quality and first-time results. This is evidenced by the testimony of his clients as well as his subcontractor, who all praise his fairness and concern for every individual working on one of his projects as he knows that his long-term success is tied directly to all of theirs. Additionally, he extends his personal reach far beyond the jobsite by personally investing in his community, as a mentor, church elder, and family man.
