

Karl Thompson

Superintendent

Karl Thompson is a Superintendent with AccuTech Construction, who brings more than 35 years of field construction expertise. He has a storied career of building most any sort of facility across the state of Florida and is responsible for building some of AccuTech's most demanding projects in the Data Center and Industrial markets. His attention to every detail and his straight forward manner builds confidence in the entire project team from the client, their consultants to the subcontractors and official inspectors. He keeps a laser like focus on jobsite safety and security, while making sure the subcontractors are adhering to the schedules, and desired project quality. As most Karl's projects include some of the most advanced systems and strictest tolerances, he is a stickler for details and is constantly covering every corner of the site reviewing work. His record shows that he is intolerant of substandard work and as a result his projects seldom require re-inspections allowing his projects to adhere to some of the most aggressive project schedules in the industry. He thoroughly enjoys a job well done and has the hand-on discipline for getting the details correct so that the owner's goals are realized. When not building things, Karl is involved with coaching youth baseball, and enjoys spending time with his family.

Construction Industry working as a superintendent on dozens of various projects in Central Florida Karl has displayed proven skills and experience to perform:

- Site Supervision
- Constructability Reviews
- Value Engineering
- Scheduling
- Cost Estimating
- Construction Services
